Maksym Shkolnyi

Front-End Developer

Front-End Developer with over 5 years of experience creating dynamic, user-friendly web applications. Proficient in HTML5, CSS3, JavaScript, TypeScript, Vue.js, React.js, and PHP, with a strong foundation in responsive design, unit testing, and version control. Demonstrated ability to enhance user experience, optimize performance, and collaborate effectively within cross-functional teams. Experienced in working closely with designers and back-end developers to deliver seamless, efficient, and visually appealing web applications. Passionate about continuous learning and applying best practices to build high-quality, scalable solutions. Open to relocation and motivated to take on challenging projects that drive innovation and improve operational efficiency.

Work history

Front-End Developer
myTU, Klaipėda, Lithuania (Remote)

2024
Current

Currently working as a Front-End Developer at myTU, a digital banking platform combining fintech with travel-industry perks and loyalty benefits. Focused on enhancing and maintaining web applications to improve usability, performance, and overall user experience.

- Developed and implemented a KYB questionnaire for automated verification of business data and UBOs, streamlining onboarding and reducing manual review which delivered measurable impact with faster onboarding and improved compliance.
- Enhanced the front-end by adding new features, fixing bugs, and updating functionality, resulting in better performance, usability, and reliability.

Programmer
Žemaitijos pienas, Telšiai, Lithuania

2022
2024

Worked as web/software developer for second-largest dairy products company in Lithuania. Completed numerous of projects which increased productivity of company.

- Developed a portal for employees where they can learn new material, take tests and sign documents. As well as created software for portal management.
- Designed and implemented a portal for users to declare and keep track counter information.
- Created fake pixel-perfect Microsoft login form within tight deadlines (for staff education purposes).
- Developed OEE tracking site with real-time data visualization which drives to improve manufacturing processes.
- Created farmers' portal which allowed to access real-time milk transportation data, including quantity, types, fat/protein percentages,and more.
- Implemented responsive designs for optimal viewing on various screen sizes, enhancing accessibility and user engagement.

Freelance Developer

Unemployed, Klaipėda, Lithuania

Specialized in transforming design concepts into interactive websites. Throughout my freelance activities, I honed my skills and learned all the necessary elements of web development. Proficient in HTML, CSS, and JavaScript, I crafted visually appealing, responsive interfaces that aligned with clients' brands. My focus was on delivering pixel-perfect, user-friendly solutions that stood out in the digital landscape.

- Acquired and mastered essential skills in HTML, CSS, and JavaScript through hands-on experience and continuous learning during freelance activities.
- Delivered pixel-perfect, user-friendly solutions, contributing to a positive online presence for various clients.
